

*My project will focus on the relationship between (speaker's) hand gesture/face and sentiment in communication. 05 Oct 2021*

1. Summary of actions agreed during last meeting

1-1. I shared the time plan to manage my project.

2. Summary of work done & results this week

2-1. I updated my research steps

2-2. I have selected a dataset to use

2-3. I extracted facial features using Openface from Youtube video.

3. Questions to be discussed during the meeting

3-1. How many people do I need at least to manually annotate sentiment on a Youtube video?

4. Proposed objectives for next week

4-1. I will explore technologies for (1)sentiment analysis from text, extracting (2)body posture and (3)facial features, and implement them.

4-2. I will plan specific output/objective variables. (Positive/Negative/Neutral ?)

4-3. According to the output, the Youtube video will be annotated manually.

5. Articles read this week

5-1. Estimating the Intensity of Facial Expressions Accompanying Feedback Responses in Multiparty Video-Mediated Communication

5-2. Predicting Influential Statements in Group Discussions using Speech and Head Motion Information
