My project will focus on the relationship between (speaker's) hand gesture/face and sentiment in communication. 05 Oct 2021

1. Summary of actions agreed during last meeting
- 1-1. I have created the following models to predict emotions using Logistic Regression and 3 layers NN model (Pytorch)
- 1-2. Dissertation: I have written a draft version of Chapter 3 (Design/Implementation part)

2. Summary of work done & results this week
- 2-1. Improved model for predicting emotions using a 3-layer NN model (Pytorch)
- 2-2. Observed and visualised the data for the report
- 2-3. Dissertation: I have written a draft version of Chapter 4 (Testing/ Evaluation part)

3. Questions to be discussed during the meeting
- 3-1. To Be Updated

4. Proposed objectives for next week
- 4-1. Observed and visualised the data for the report
- 4-2. Improving the prediction accuracy for OpenPose
- 4-3. Dissertation: Write a draft version of Chapter 5 (Conclusion)

5. Articles read this week
- 5-1. Explorations in engagement for humans and robots
- 5-2. Attention Is All You Need
- 5-3. Unification-based multimodal integration
